**If the "% SABRC Compliant" rate (column 4) is less than 50% for a category, please provide an explanation. An explanation for all deficient categories is important during the review of your annual report. In addition, please include any other relevant information or issues.**

This report includes reports gathered from 22 CSU campuses and the Chancellor's Office. One campus did not report (CSU Channel Islands). Reasons for <50%: the purchasing of most of these materials is so decentralized on most campuses that systems are not yet in place to be able to track and report this information accurately. Regarding Metal - it is our policy to default all metal spend to be SABRC compliant.

### Contracts and Procurement

State agencies must procure post-consumer recycled content products whenever feasible, including as part of contracts. Each state agency shall require the businesses with whom it contracts to use, to the maximum extent economically feasible in the performance of the contract work, recycled products. Please refer to [Public Contract Code Section 12200-12217](#). State agencies should track all applicable purchases within [Statewide contracts or leveraged procurement agreements](#).

**Does your State Agency(ies) employ outside Contractors that provide goods and/or service?**
