

ANDREOLI FACULTY SERVICE AWARD 2021 REQUEST FOR NOMINATIONS

www.calstate.edu/csUPERB

Important Dates and Information:

RFA Release Date: August 27, 2020
Nomination Deadline: October 19, 2020 before 5:00 p.m. pacific time
Award Announcement: During CSU Biotechnology Symposium, Jan. 7-10, 2021
Award Amount: \$1,000

Program Description:

The Andreoli Faculty Service Award honors a California State University (CSU) faculty member who has made outstanding contributions to the development of biotechnology programs in the CSU system.

This award is made in honor of Dr. Anthony Andreoli (CSU Los Angeles) who had high expectations for everyone, especially students and colleagues. He was entirely committed to his students and to the idea that the CSU has a special role to play in higher education by providing opportunities to a large population of underrepresented and non-traditional students who otherwise would have fewer options for advancement. Because he felt fortunate that life had provided him with many opportunities, Dr. Andreoli believed that it was his responsibility to do everything he could in order to provide similar opportunities for others.

The award winner is honored during the 33rd CSU Biotechnology Symposium being held virtually this year and receives an award of \$1000.

Award Eligibility:

- Tenured or tenure-track CSU faculty, employed in the system for a minimum of 5 years, are eligible for this award.
- Nominees and nominating committee members should be available to attend the 33rd annual CSU Biotechnology Symposium January 7-10, 2021.

Nomination Instructions:

NOMINATION DEADLINE is October 19, 2020, before 5:00 p.m. pacific time.

Nominations must be submitted by a CSU faculty member or administrator.

Nominations must be submitted before the deadline electronically using the CSYou submission form (see application link at www.calstate.edu/csUPERB) in either Microsoft WORD or Adobe PDF format. Faculty can log into the CSYou system using their campus ID/username and password.

A complete Andreoli Nomination Package consists of all of the following:

1. Signed Nomination Letter from a CSU faculty member or administrator (limit 2 pages; submitted on campus letterhead)
2. Nominee's Curriculum Vitae (CV), and
3. At least two additional, signed Letters of Support (limit 2 pages each) from students, alumni, colleagues, and/or collaborators.

Award Selection Process:

The CSUPERB Program Office will evaluate nomination packages for completeness and eligibility. Only complete nomination packages (see above) will be considered. Qualified nominations will be forwarded to a review committee comprised of CSUPERB Faculty Consensus Group members and Andreoli Awardees.

The selection committee will determine the award recipient based on nomination letters and nominee's CV that testify to:

- The nominee's leadership of and impact on biotechnology programs in the California State University system.
- The nominee's strong commitment to providing access to biotechnology programs to underrepresented and non-traditional students (a particular commitment and focus of Professor Andreoli's career).

Special consideration will be given to nominees who have served on CSUPERB committees or participated in program governance. Up to one award will be made.

The Award:

The award is a \$1,000 grant for the awardee's use on their campus. One award is made each year and is announced, and recipient recognized, at the CSU Biotechnology Symposium.

The award is made with State of California dollars and can be used for any item related to the awardees academic or research activities. This includes, but is not limited to, salary for allowable non-academic activities, purchase of release time (and associated benefits), research or academic travel, equipment (including tablets /computers), research supplies, etc. The recipient must comply with state, CSU and campus spending guidelines for the use of state funds.

CSUPERB Statement of Principles on Professional Behavior:

CSUPERB values diverse perspectives where all individuals can flourish. CSUPERB is dedicated to providing an environment that fosters intellectual curiosity and creativity, free and lively debate conducted with mutual respect for individuals, and freedom from intolerance. These values are applicable to any aspect of CSUPERB's work, including meetings, symposia, and funded activities. Specifically, members of our community value:

- Critical scholarly discourse for the purpose of understanding, advancing scientific ideas, and educating the next generation of science and engineering practitioners;
- Education and research environments where all people are treated equally, regardless of race, gender, ethnicity, sexual orientation and free of bias, hostility, and harassment of any kind;
- Conversations and discussions where community members can share ideas in a collegial atmosphere that is inclusive and values everyone's input and opportunity to participate;
- Advocacy for equality and inclusivity in science;
- The use of inclusive examples, graphics, and stories in presentations and proposals;
- Access for all community members, including traditionally underrepresented groups, to fully participate in and become leaders in science;
- The support and promotion of the education and careers of all scientists, engineers, and bio-entrepreneurs;
- Leadership in our fields to strengthen scientific mentorship and create an atmosphere of collaboration;
- Commitment to our own education and participation in activities related to recognizing and eliminating implicit bias.

All participants in CSUPERB events and activities are expected to follow the requirements of Title V, Title IX, and California State University (CSU) Executive Orders and adhere to the CSUPERB Principles of Professional Behavior and values. Non-CSU participants who do not follow these

expectations may be asked to leave a CSUPERB event or activity and/or prohibited from participation in future CSUPERB events or activities.

Program Contacts:

Nominators are encouraged to contact CSUPERB via email instead of telephone due to the uncertain “work-from-home” scheduling during the COVID-19 pandemic.
